

## ENGAGING PRACTICE AND PLAY

BOWLSPARC is a range of Targets and Obstacles that have been designed to create a highly visual learning environment to help develop the key fundamental skills of Bowls, used effectively by Coaches and Clubs, it has the potential to transform the way players young and old are introduced to the sport. It can also be utilised by established players, keen to improve their ability and performance levels through purposeful practice.

'The BOWLSPARC kit has been a massive success in Scotland – more than 180 clubs are now using it as part of their coaching programme, community open days, and club social events.

The kit is an ideal way to introduce new players to bowls, and has also proven to be a fantastic resource for coaching developing players. BOWLSPARC is easy to set up in any location – on and off the green – and offers a range of options for clubs and coaches. We've even seen club members using BOWLSPARC to have a bit of fun on a quiet evening.'
